Energy performance certificate (EPC)

iles on letting this property

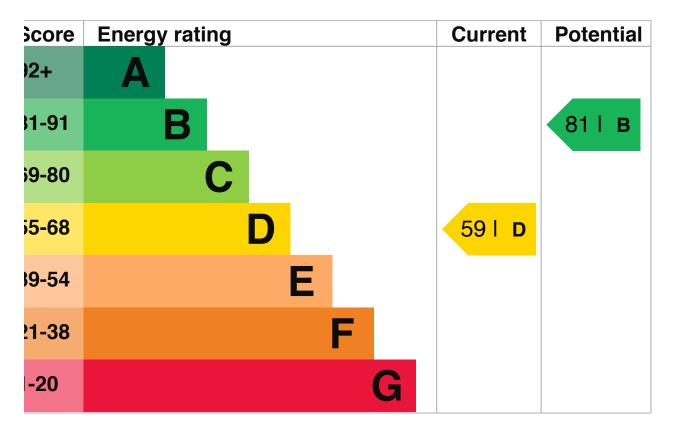

operties can be rented if they have an energy rating from A to E.

he property is rated F or G, it cannot be let, unless an exemption has been registered. You can read <u>guidance for landlords of regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-dlord-guidance).</u>

nergy efficiency rating for this property

is property's current energy rating is D. It has the potential to be B.

e how to improve this property's energy performance.

e graph shows this property's current and potential energy efficiency.

operties are given a rating from A (most efficient) to G (least efficient).

operties are also given a score. The higher the number the lower your fuel bills are likely to be.

e average energy rating and score for a property in England and Wales are D (60).

eakdown of property's energy performance

is section shows the energy performance for features of this property. The assessment does not consider the condition of a sture and how well it is working.

ch feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

nen the description says 'assumed', it means that the feature could not be inspected and an assumption has been made base the property's age and type.

| ature | Description | Rating |
|--------------------|---|-----------|
| Ile | Cavity wall, filled cavity | Average |
| of | Pitched, 100 mm loft insulation | Average |
| ndow | Fully double glazed | Average |
| in heating | Boiler and radiators, mains gas | Good |
| in heating control | Programmer, room thermostat and TRVs | Good |
| t water | From main system | Good |
| ıhting | Low energy lighting in 88% of fixed outlets | Very good |
| or | Suspended, no insulation (assumed) | N/A |
| condary heating | Room heaters, dual fuel (mineral and wood) | N/A |

rimary energy use

e primary energy use for this property per year is 284 kilowatt hours per square metre (kWh/m2).

What is primary energy use?

nvironmental impact of this property

ne of the biggest contributors to climate change is carbon dioxide (CO2). The energy used for heating, lighting and power in comes produces over a quarter of the UK's CO2 emissions.

| n average household roduces | 6 tonnes of CO2 |
|------------------------------------|-------------------|
| his property produces | 3.7 tonnes of CO2 |
| his property's potential roduction | 1.5 tonnes of CO2 |

making the <u>recommended changes</u>, you could reduce this property's CO2 emissions by 2.2 tonnes per year. This will help to tect the environment.

vironmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how ergy is consumed by the people living at the property.

by to improve this property's energy performance

aking any of the recommended changes will improve this property's energy efficiency.

ou make all of the recommended changes, this will improve the property's energy rating and ore from D (59) to B (81).

What is an energy rating?

ecommendation 1: Increase loft insulation to 270

rease loft insulation to 270 mm

| /pical installation cost | £100 - £350 |
|---|-------------|
| pical yearly saving | £37 |
| otential rating after carrying out commendation 1 | 61 I D |

ecommendation 2: Floor insulation (suspended floor)

or insulation (suspended floor)

| pical installation cost | £800 - £1,200 |
|--|---------------|
| pical yearly saving | £87 |
| otential rating after carrying out commendations 1 and 2 | 65 I D |

ecommendation 3: Replace boiler with new condensing boiler

ndensing boiler

| /pical installation cost | £2,200 - £3,000 |
|--------------------------|-----------------|
| /pical yearly saving | £46 |

otential rating after carrying out commendations 1 to 3

ecommendation 4: Flue gas heat recovery device in onjunction with boiler

ие gas heat recovery

| /pical installation cost | £400 - £900 |
|---|-------------|
| pical yearly saving | £21 |
| otential rating after carrying out commendations 1 to 4 | 68 I D |

ecommendation 5: Solar water heating

lar water heating

| pical installation cost | £4,000 - £6,000 |
|---|-----------------|
| pical yearly saving | £24 |
| otential rating after carrying out commendations 1 to 5 | 69 I C |

ecommendation 6: Solar photovoltaic panels, 2.5 kWp

lar photovoltaic panels

| pical installation cost | £5,000 - £8,000 |
|---|-----------------|
| pical yearly saving | £330 |
| otential rating after carrying out commendations 1 to 6 | 81 I B |

1d energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

stimated energy use and potential savings

stimated yearly energy cost for this roperty

£804

otential saving

£216

e estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is to based on how energy is used by the people living at the property.

e estimated saving is based on making all of the recommendations in how to improve this property's energy performance.

r advice on how to reduce your energy bills visit Simple Energy Advice (https://www.simpleenergyadvice.org.uk/).

leating use in this property

ating a property usually makes up the majority of energy costs.

stimated energy used to heat this property

| pace heating | 9001.0 kWh per year |
|--------------|---------------------|
| ater heating | 2011.0 kWh per year |

otential energy savings by installing insulation

pe of insulation

Amount of energy saved

ft insulation

639 kWh per year

u might be able to receive <u>Renewable Heat Incentive payments (https://www.gov.uk/domestic-renewable-heat-incentive)</u>. This will perform to reduce carbon emissions by replacing your existing heating system with one that generates renewable heat. The timated energy required for space and water heating will form the basis of the payments.

ontacting the assessor and accreditation scheme

is EPC was created by a qualified energy assessor.

ou are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

ou are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

creditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
